

Dezinformacije u vrijeme COVIDA-19

Izv. prof. dr. sc. Igor Kanižaj

„Dezinformacije se šire brže od virusa” Tendai Joe

- Koji je za vas glavni izvor informacija u vrijeme Covida-19?
- Vjerodostojnost službenih izvora informacija?
- Jeste li se susreli s dezinformacijama?
- U zadnja dva tjedna koje su bile najčešće dezinformacije?
- Na koji ste način bili izloženi dezinformacijama?

Što su dezinformacije?

„Pojam koji uključuje sve oblike lažnih, netočnih ili zavaravajućih informacija koje su **osmišljene, predstavljene i promovirane** kako bi nanijele štetu javnosti ili radi stjecanja profita.“

(Report of the independent High level Group on fake news and online disinformation).

Ali ni to nije
sve...

- zavaravajuće,
- izmišljene,
- nisu točne,
- govore o događajima koji se nikad nisu dogodili,
- prenose izjave koje nikad nisu bile izrečene te najave događaja koji se nikada neće dogoditi,
- narušavaju povjerenje u društvu,
- umanjuju vjerodostojnost medija i kanala putem kojih se prenose,
- mogu utjecati na naša shvaćanja, znanja i ponašanja,
- mogu biti namjerne i slučajne,
- netko ih je namjerno proizveo i plasirao u medije,
- nisu novi fenomen i postojale su i prije medija,
- doživjele su svoj procvat s razvojem društvenih medija

Koji od navedenih je za vas najpouzdaniji izvor
za informacije o Covidu-19?

Borba protiv dezinformacija

Šire se lažne informacije u zdravstvu, među ostalim i o COVID-u 19. Ažurne informacije o pandemiji bolesti COVID-19 važno je tražiti samo u vjerodostojnim izvorima.

Predlažemo da slijedite savjete [nacionalnih zavoda](#) za javno zdravstvo te internetske stranice mjerodavnih europskih i međunarodnih organizacija: [ECDC](#) i [WHO](#). Izbjegavajte dijeliti neprovjerene informacije koje dolaze iz sumnjivih izvora.

Europska komisija pomaže u borbi protiv dezinformacija bliskom suradnjom s internetskim platformama. Potičemo ih da promiču vjerodostojne izvore, niže rangiraju sadržaje koji su provjereno netočni ili koji dovode u zabludu te uklone nezakonit sadržaj ili sadržaj koji bi mogao biti štetan za zdravlje.

#policija podnijela optužni prijedlog: 29-godišnjakinja društvenom mrežom širila #lažne vijesti: predstavila se kao liječnica 🏥 u Puli, dijelila savjete i lažne informacije o broju oboljelih na području Vrsara i tako uznemirila građane

bit.ly/2xH1w4u

@koronavirus_hr

Uznemirila građane lažnom objavom da je zaražena

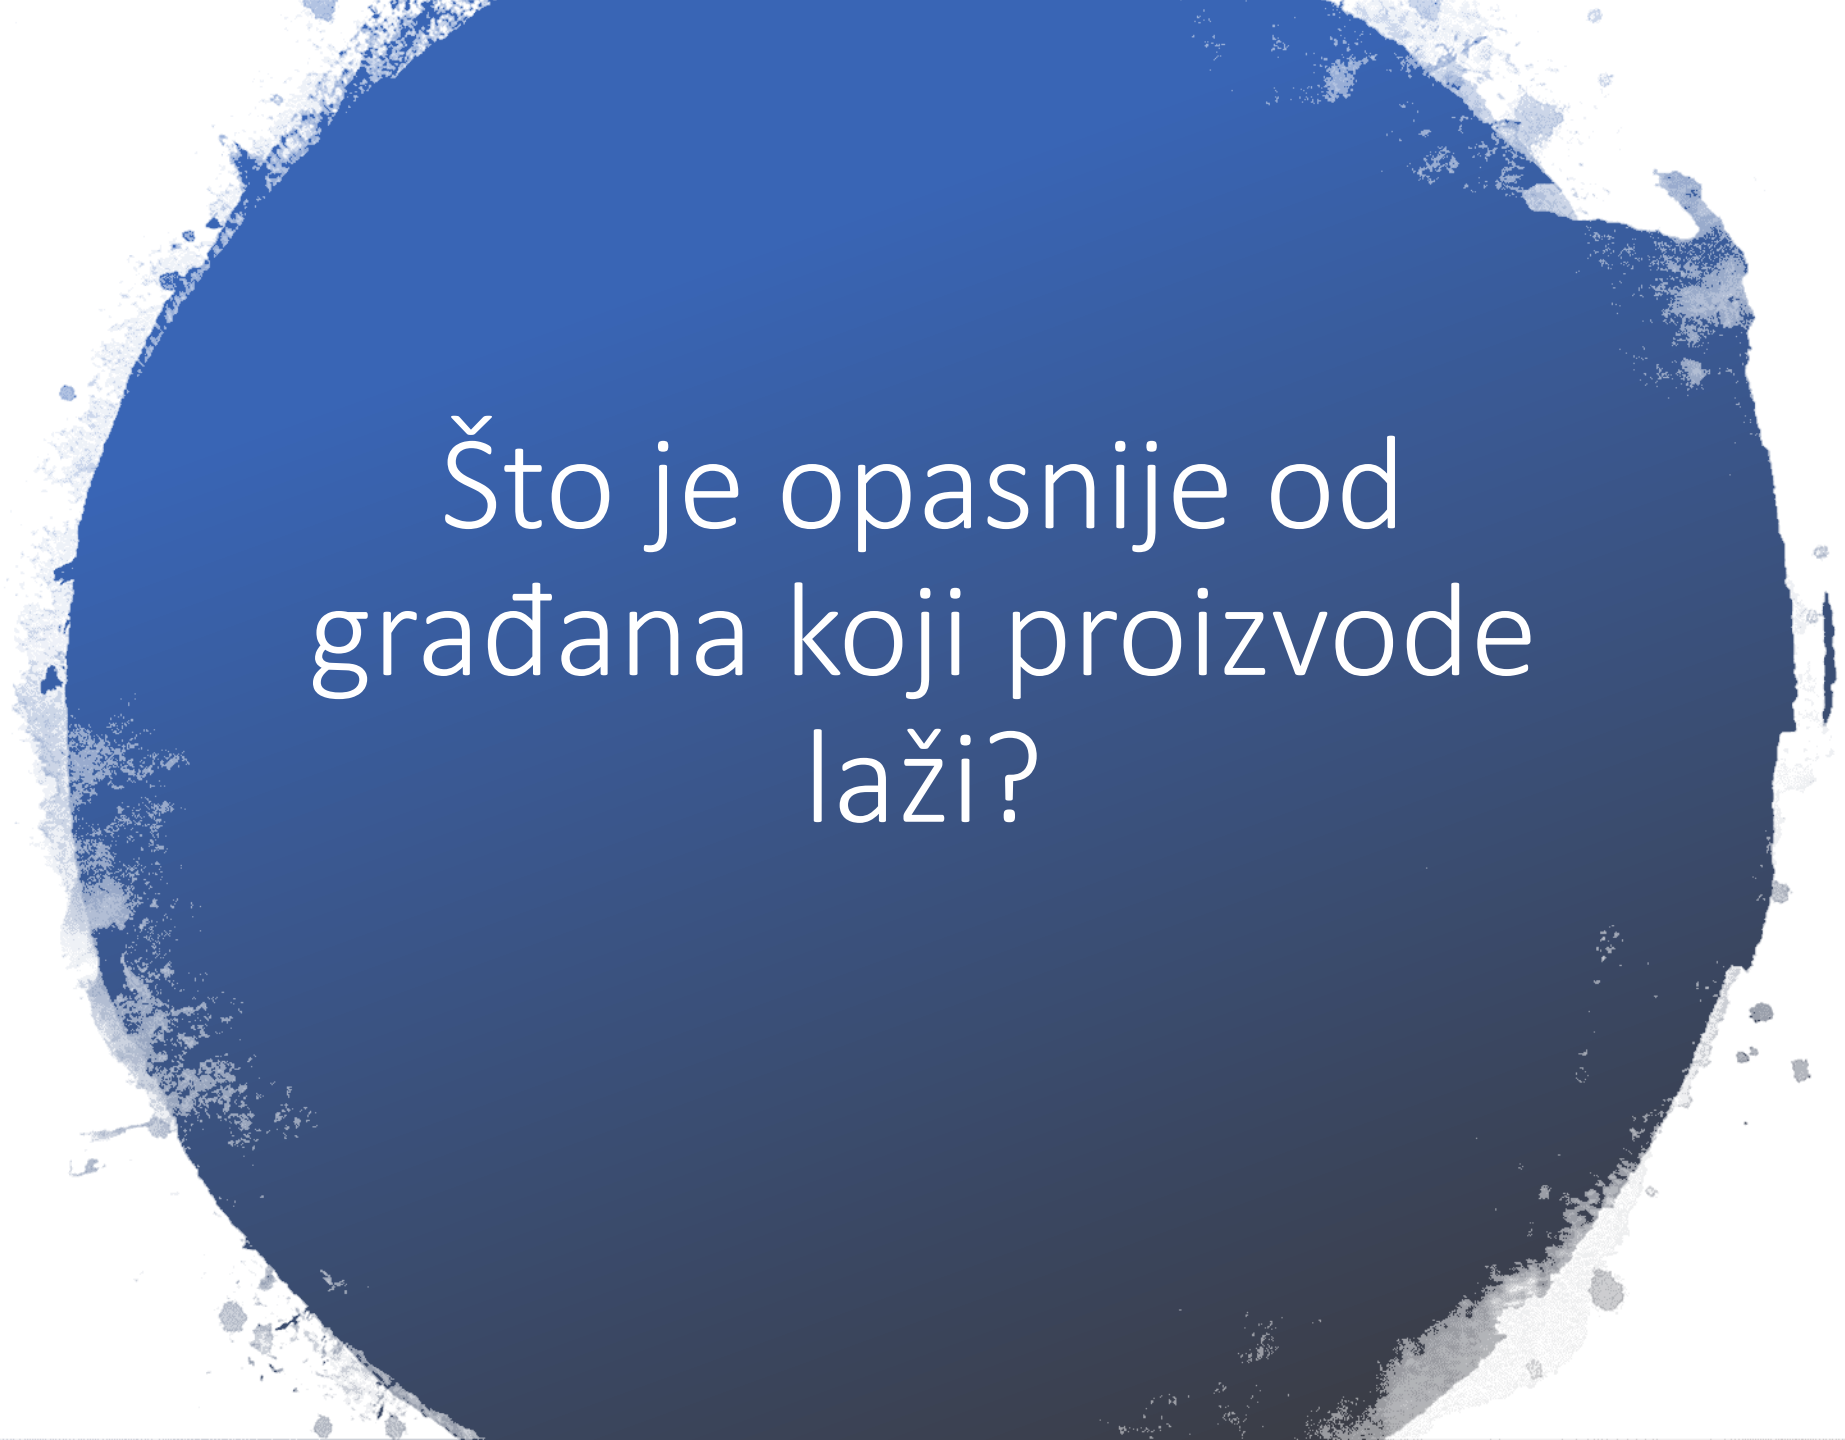

Lažima o ozbiljnoj bolesti nije mjesto na društvenim mrežama

Akcija policije započela je jučer, 3. travnja, po saznanju o objavi 34-godišnjakinje s područja Vrbovca, u kojoj je na društvenoj mreži javno objavila vijest da je zaražena corona virusom. Tako javno objavljena informacija, razumljivo da je uznemirila osobe koje ju poznaju i s njom rade. Po takvom saznanju i provjerom objave, kroz suradnju epidemiologa i policijskih službenika utvrđeno je stvarno stanje odnosno potvrđena činjenica da ona ne boluje od te bolesti. Tim je radom policije i epidemiologa dokazano da je objavu svjesno izmislila čime je remetila mir i spokojstvo građana i počinila prekršaj iz članka 16 Zakona o prekršajima protiv javnog reda i mira.

Protiv 34-godišnjakinje, radi izmišljanja ili širenja lažnih vijesti kojima se remeti mir i spokojstvo građana, slijedi prekršajni postupak sukladno odredbama čl. 16 Zakona o prekršajima protiv javnog reda i mira.

Types, Sources, and Claims of COVID-19 Misinformation

Authors: J. Scott Brennen, Felix M. Simon, Philip N. Howard, and Rasmus Kleis Nielsen

<https://reutersinstitute.politics.ox.ac.uk/sites/default/files/2020-04/Brennen%20-%20COVID%2019%20Misinformation%20FINAL%20%283%29.pdf>

Glavni rezultati

- Za više od 900% porastao broj članaka koje su provjeravali fact-checkeri.
- 59% korigirani ili dekontekstualizirani članci.
- 38% u potpunosti fabricirani.
- Samo 20% dezinformacije – političari, javne osobe, ali značajno više dijeljenja nego kod običnih građana.
- Najsporije se brišu objave koje su označene kao lažne na Twitteru (59%), YouTubeu (27%), Facebooku (24%)

Figure 2: Reconfigured vs fabricated misinformation

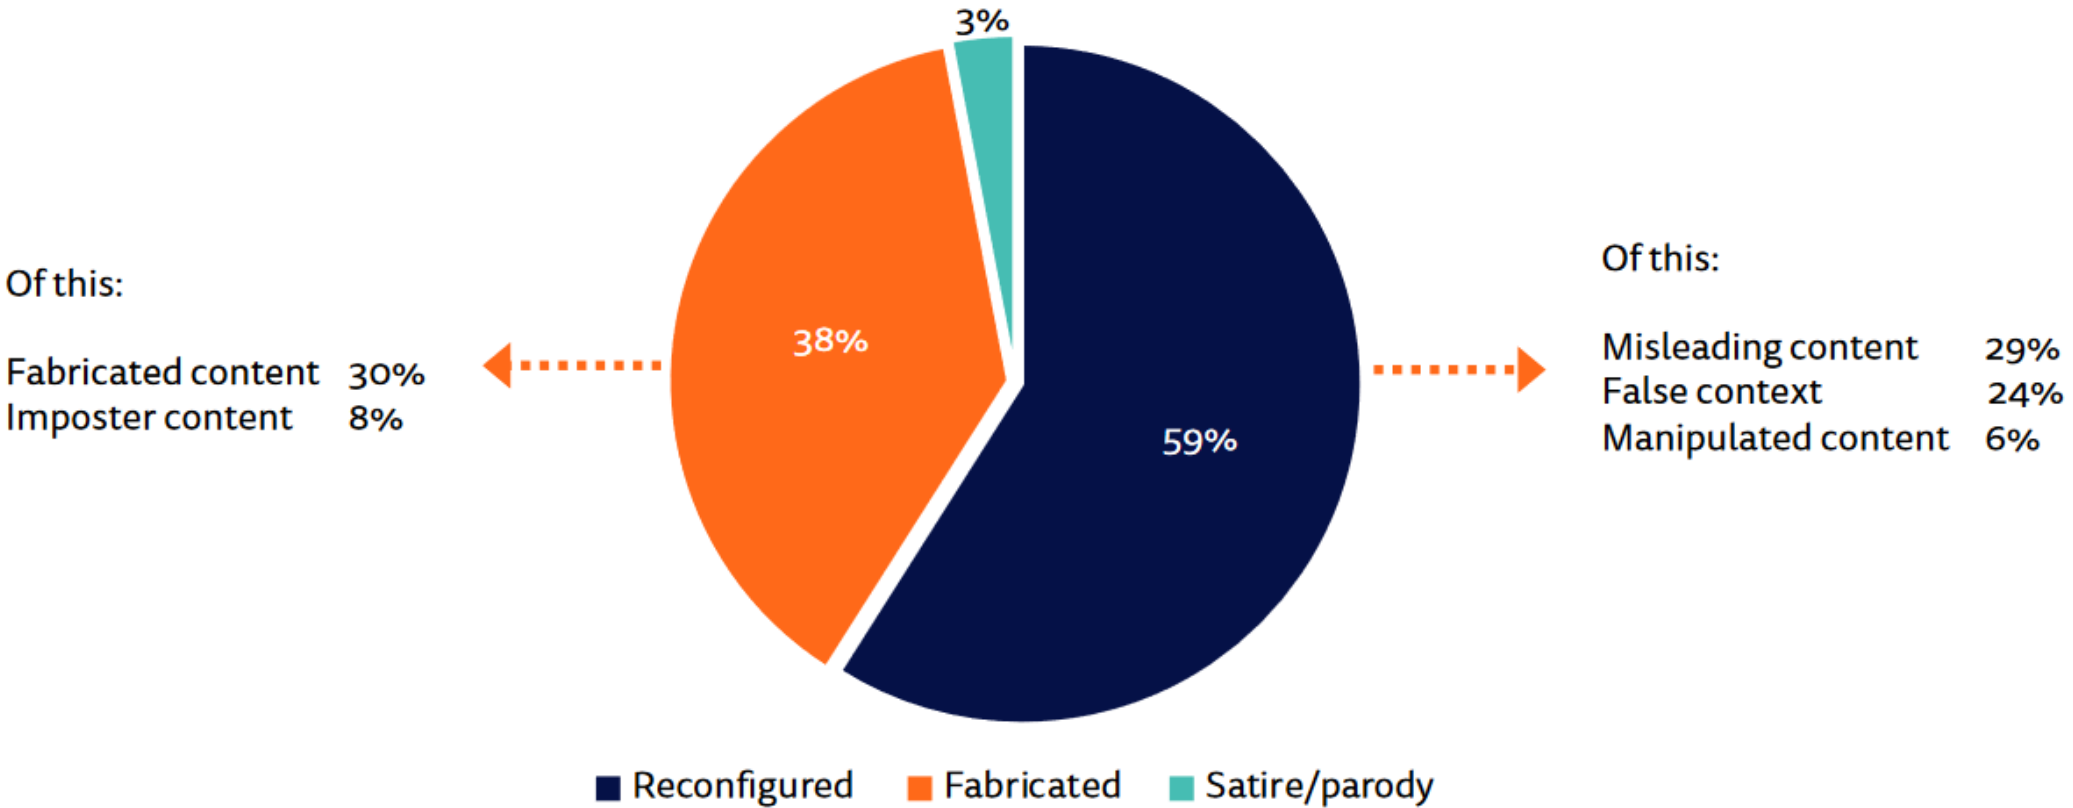

Figure 2 shows the proportion of reconfigured (N=133) and fabricated (N=86) misinformation in the sample (N=225) and the types of misinformation that constitute both reconfigured and fabricated misinformation.

Be understanding !!! A Japanese doctor offers excellent advice on preventing COVID-19

New coronavirus may not show symptoms for several days (14-27 days). How can one know if a person is infected? By the time he has a fever and / or a cough and goes to the lung hospital, the patient may have 50% fibrosis, and then it's too late!

Taiwanese experts provide simple self-monitoring that we can do every morning:

Take a deep breath and hold your breath for more than 10 seconds. If you can do this successfully without coughing and without difficulty, without anxiety or chest tightness, it shows that you do not have fibrosis and generally indicate no infection. Check yourself every morning in a fresh air environment

The Japanese physician treating COVID-19 provides the best advice on preventing this:

Everyone should make sure the mouth and throat are always moist. Drink some water every 15 minutes. Why not? Even if the virus gets into your mouth, drinking water or other fluids will help wash it down the esophagus into the stomach. When the virus is in the stomach - the hydrochloric acid in your stomach will kill the germs. If you do not drink enough water regularly, the virus can enter the airways and into your lungs, which is very dangerous to get.

<https://factcheck.afp.com/afps-coronavirus-verification-hub>

is currently no 'cure' for COVID-19.

This misinformation has included:

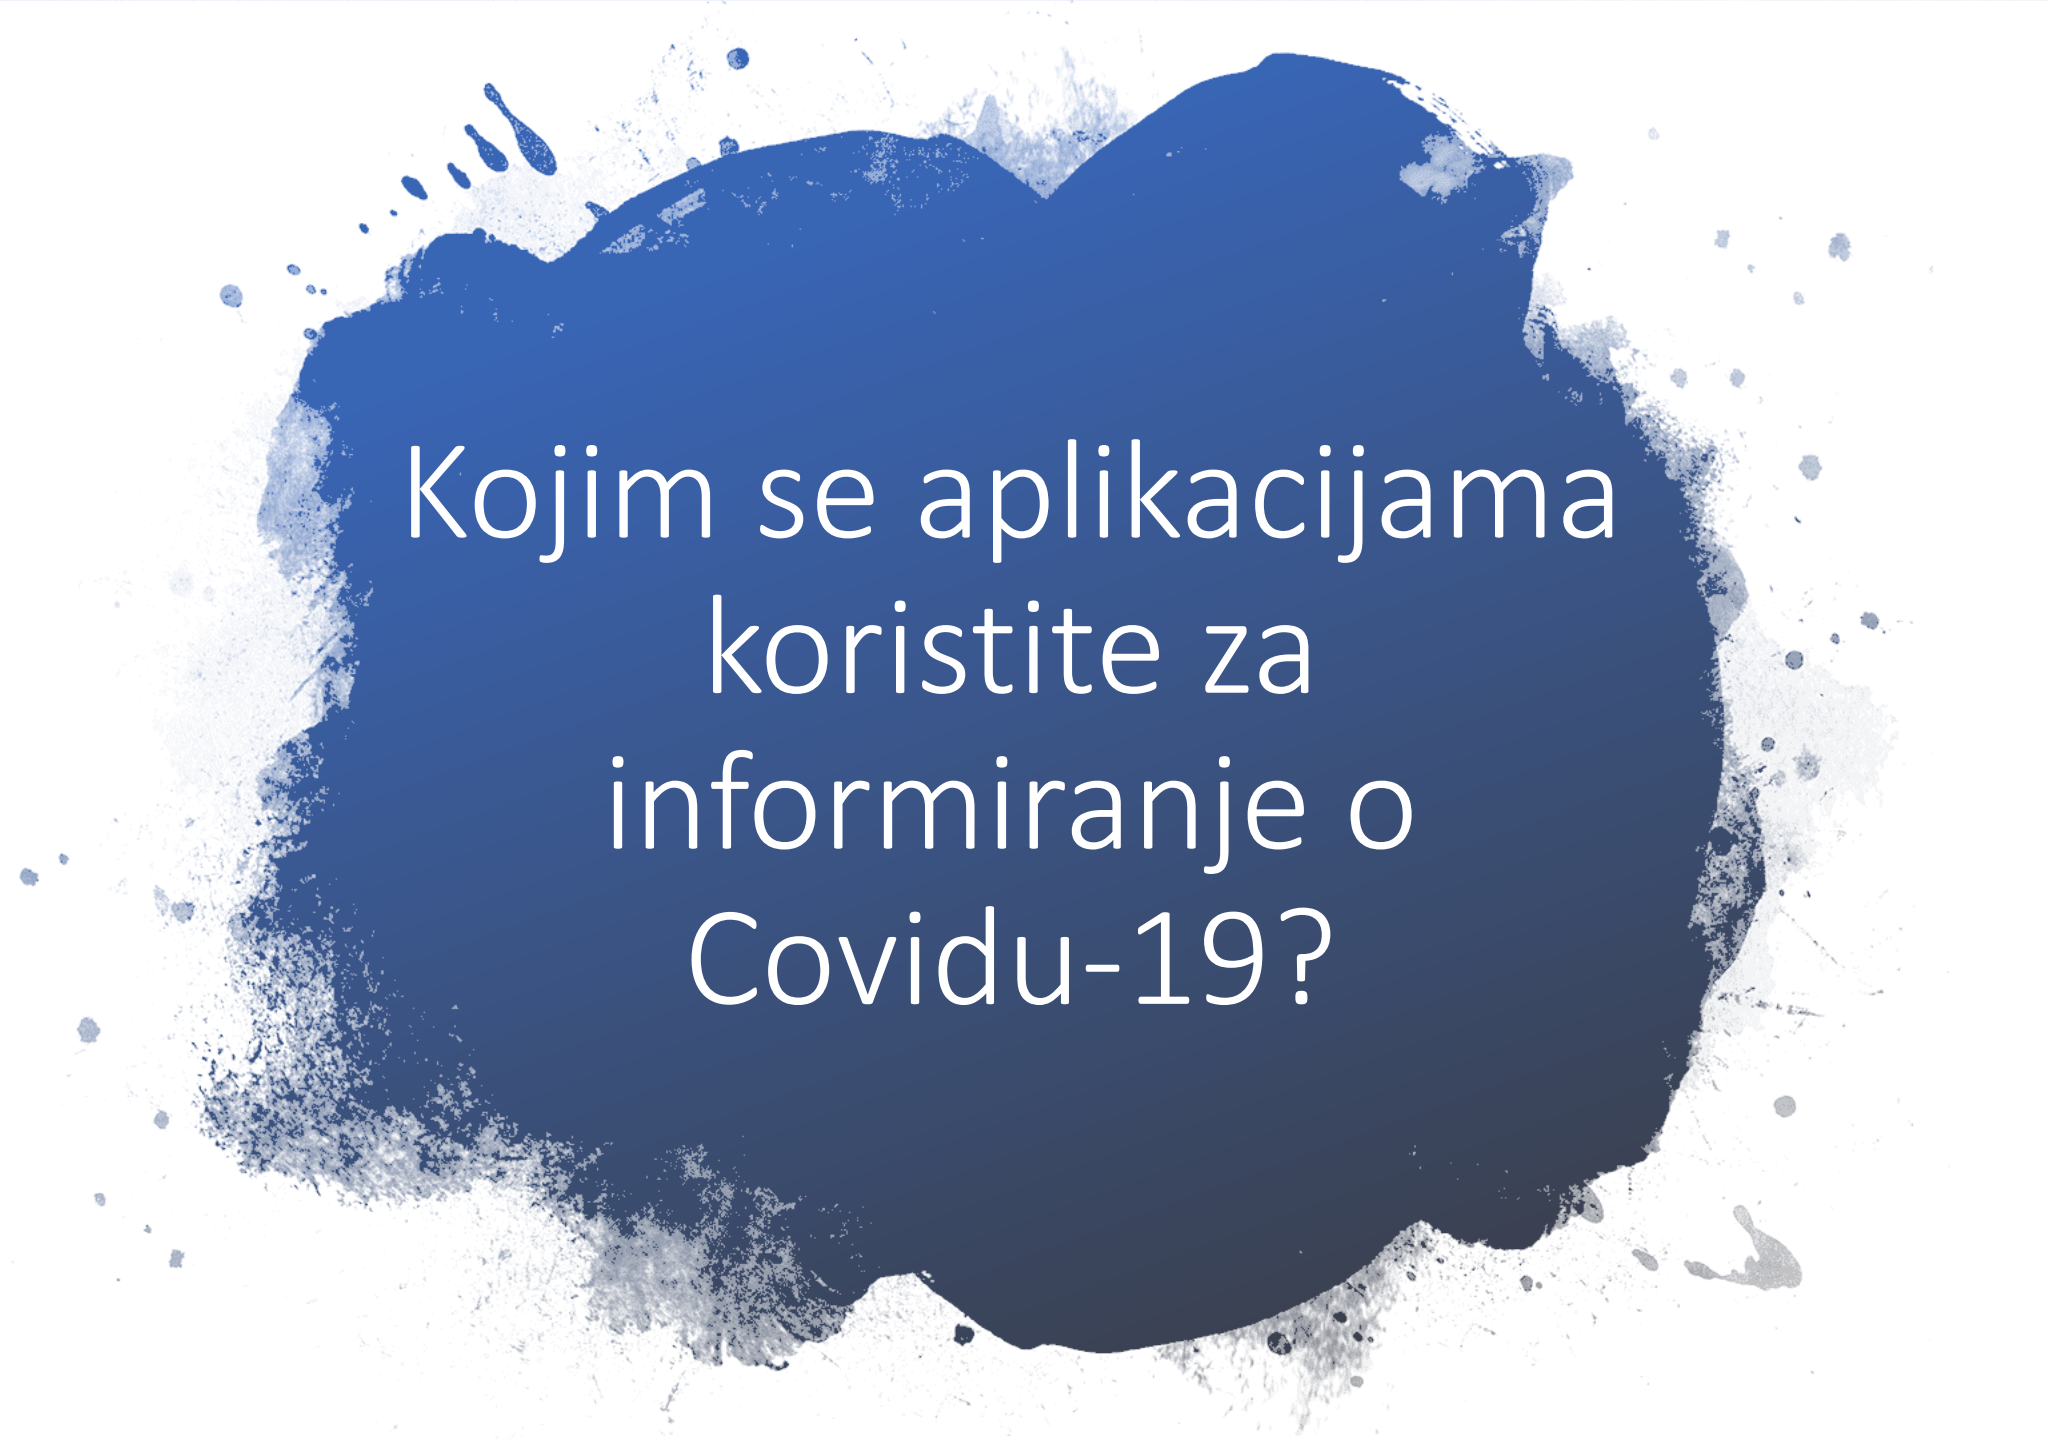

treatments: drinking tea // inhaling steam // water // water with lemon // boiled garlic water // cannabis // bananas // boiled ginger // silver particles // medicinal herbs // volcanic ash // vitamin D // chinese herbal medicine // 'green chiretta' herb // tinaspora crispa plants // asafoetida // saline solution // anti-malaria drugs // cabbage
as well as: smoking // going into the sun // holding your breath to see if you've been infected // having a runny nose // gargling with warm salt water or vinegar
claims that the following transmit the virus: chicken // goat meat // rhino horn //

The complete list is below. Please check here if you see an unverified claim.

Did you see that great advice on the coronavirus from that doctor?

Q1.3 How much do you trust or not the news and information you access through...

Online social networks and messaging apps (%)

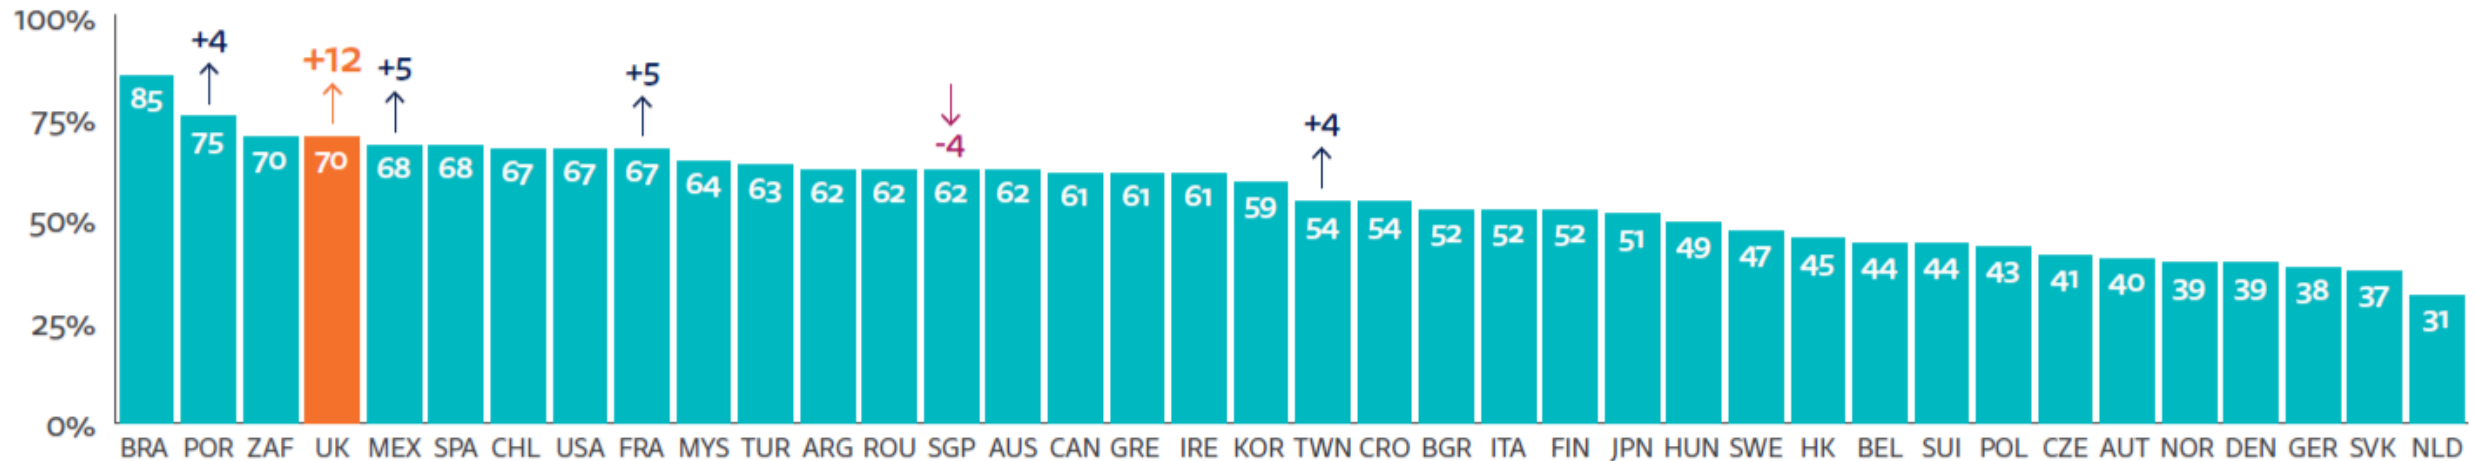

Base: All respondents (N=26 576)

MISINFORMATION AND DISINFORMATION

More than half (55%) of our sample across 38 countries remains concerned about their ability to separate what is real and fake on the internet. Concern is highest in Brazil (85%), South Africa (70%), Mexico (68%), and France (67%), and lowest in the Netherlands (31%), and Germany (38%), which tend to be less polarised politically.

The biggest jump in concern (+12pp) came in the UK (70%) where the news media have taken a lead in breaking stories about misinformation on Facebook and YouTube and there has been a high-profile House of Commons inquiry into the issue.

PROPORTION CONCERNED ABOUT WHAT IS REAL AND WHAT IS FAKE ON THE INTERNET WHEN IT COMES TO NEWS – ALL MARKETS

Q_FAKE_NEWS_1. Please indicate your level of agreement with the following statement. – Thinking about online news, I am concerned about what is real and what is fake on the internet. Base: Total sample in each market ≈ 2000, Taiwan = 1005.

The Wuhan Virus Escaped from a Chinese Lab

By Daniel John Sobieski

Removes Pathogens From Surface

Quickly sanitize anything with ultraviolet light. Everybody wants that now

Toplevelreviews.com

First of all, Wuhan is a place and not a race, and to identify the coronavirus by its place of origin, like naming the Ebola Virus for a river in Zaire, is not racist or xenophobic — it's merely accurate. There is no racism or xenophobia in labeling an infection "Rocky Mountain Spotted Fever" or calling something "Lyme Disease" after a nearby town in Connecticut.

What calling this latest virus the Wuhan Virus is is a reminder of the multiple contagions China has spawned and released on an unsuspecting world. Nor is connecting some very big, ugly, and obvious dots just another conspiracy theory to be dismissed out of hand.

From the beginning China has been less than forthcoming about this virus and resisted sharing critical data and access to WHO and CDC specialists. And have we forgotten Dr. Li Wenliang, the 33-year-old ophthalmologist based in Wuhan, the epicenter of the contagion, who tried to tell the world that China was hiding something malevolent, only to be silenced and imprisoned by Chinese authorities for allegedly fabricating lies about the disease's deadly potential? He would later die of the disease [he tried to warn us about and the Chinese tried to keep under wraps](#):

KAKO PREPOZNATI LAŽNE VIJESTI

 RAZMISLI O IZVORU Dobro prouči stranicu, istraži njezinu svrhu i podatke o kontaktu.	 PROČITAJ SVE! Senzacionalistički naslovi privlače klikove. O čemu je zapravo riječ?
 PROVJERI AUTORA Na brzinu provjeri autora! Može li mu se vjerovati i je li to stvarna osoba?	 DODATNI IZVORI Klikni na ponuđene linkove i dodatne izvore. Provjeri sadrže li informacije koje zaista podupiru vijest.
 PROVJERI DATUM OBJAVE Ako je nešto nedavno objavljeno, ne znači da je nova vijest.	 JE LI TO ZAFRKANCIJA? Ako je previše neobično i čudno, možda je šala. Istraži stranicu i autora da bi bio siguran.
 OSVIJESTI SVOJE STAVOVE Uzmi u obzir da bi tvoji stavovi mogli utjecati na prosudbu.	 PITAJ STRUČNJAKE Pitaj knjižničara ili provjeri informacije na <i>fact-checking</i> stranicama.

Dani MEDIJSKE pismenosti

www.djecamedija.org

Od rujna do kraja studenog trajala je provedba radionica u pet osnovnih škola s područja Grada Velike Gorice. U provedbi projekta sudjelovali su OŠ Sčitarjevo, OŠ Jurja Habdelića, OŠ Eugena Kumičića, OŠ Eugena Kvaternika i OŠ Nikole Hribara. Učenici petih razreda su kroz dva školska sata učili o razvoju videoigara, njihovih brojnim pozitivnim stranama, ali i lošim utjecajima koji se mogu javiti kod pretjeranog igranja (nasilnih) videoigara. Učenici su dobili savijete o tome kako izabrati "igrice" koje su primjerene za njihovu dob te gdje potražiti one edukativne.

[Više...](#) >

Sustavnom edukacijom o medijima doprinosimo razvoju medijske pismenosti i komunikacijske kulture građana RH. Kroz projekt „Djeca medija“ djelujemo od 2010. godine.
